

# Indigenous Determination Course

Welcome to the opportunity to the Indigenous Determination Course. This course was designed to present to some and introduce to others various documents essential in establishing one's correct Identity on a local through international level. Throughout the course one will not only generate the proper documents, but will also understand the purpose of said documents, how as well as when to use which document, and which agency and or agents to present the appropriate documents. The course covers the following important matters:

**Identity** – Some of the documents generated include, Statutory Claims, Statutory Declarations. The current system of governing people in place today is counterproductive to our existence. These courses address our true identity as direct descendants of the Niiji (original, Indigenous, First, Original, Autochthonous Peoples of these lands commonly known as the americas. Upon completion one will have corrected their identity/classification on a local, statewide, and international level.

**Law & Commerce** - Making use of International Laws, applicable within and without the US, I assist with awareness, understanding and the efficient application of these laws / declarations. This followed by creating supporting documents and distributing these to the proper agencies. I feel that one of the most important changes in today's world is the proper identification of the so called "Black or African American" as the American Indian. This series of classes provide irrefutable evidence that these people are the first peoples, Indigenous, Aboriginal, Autochthonous to the Americas *and not Africa*. This is important because the truth about "Blacks or African Americans" being first peoples, pre-colonial makes them the heirs to these lands. All that remains is meeting the requirements the United Nations and other global body agencies put in place to help us claim that standing. This class provides the information, and assistance with correcting the local, state and government records in accordance with the aforementioned agencies.

## **1986 UN Report:**

*"Indigenous communities, peoples and nations are those which, having a historical continuity with pre-invasion and pre-colonial societies that developed on their territories, consider themselves distinct from other sectors of the societies now prevailing in those territories, or parts of them. They form at present non-dominant sectors of society and are determined to preserve, develop and transmit to future generations their ancestral territories, and their ethnic*
