

From SiStar Myrah (Astrologist) – 1/13/22 Video: <https://www.youtube.com/watch?v=28E-xGOWdZw>

Major Acana – world card – indicates that all of your past lives has come together and culminate (number 21 significant)

2021 – all pieces have been put into place

2022 – culmination – master numbers are 11 and 22; 11 (physical); 22 (spiritual)

We are about to spread our wings

Not 12 individual signs; 6 axes; balance; we have to become holistic

Aries (physical face of Spiritual Libra)

Taurus – (physical face of Spiritual Scorpio)

Gemini – (physical face of Spiritual Sagittarius)

Cancer – (physical face of Spiritual Capricorn)

Leo – (physical face of Spiritual Aquarius)

Virgo – (physical face of Spiritual Pisces)

Virgo – last in physical realm

Air and Fire are masculine

Earth and Water are feminine

Earth and Water (internal)

Air and Fire (external)

Spirit moves inside and out (spiral)

Sun is in Capricorn – we are fulfilling Cancer energy (ancestor energy); sign of character, integrity

Values of ancestors coming into place now

We've had many lifetimes; transformation

Aquarian new level (2013) – evolution, humanitarian, "I know"

Leo is the creative ruler – coming out of abusive power into new age rulers and step up to a new rulership

Need to learn to use our powers righteously without abusing our powers (alchemical process)

Two criteria to gauge who qualifies as a new ruler – must be secure from within; find value from own self-value within; healing and wisdom

4 members of royal spiritual universal

Just completed the sacrifice and struggle – have passed over to spiritual reward and empowerment

Big puzzle – first lifetime - mastered and then gave you access to the next to start at a higher vibration

Infinite process of Transformation, regeneration, and evolution of spiritual rulership

Fixed Cross: Aquarius opposite Scorpio

1st have to balance your own spiritual half

3 cross levels:

1 – cardinal cross – aries opposite libra and cancer opposite Capricorn – royal energy; sun sign is what you came into to focus with – but you have the full universe within you – all 12 makes your spiritual energy – activates and initiates a new level of vibration from the royal or highest point of the universe – then leads to

2 – fixed cross – Scorpio and Taurus (transformation of our values) – will set into motion what the cardinal cross has activated – reverses the energy

3 – immutable – Gemini opposite Sagittarius

Not everybody signed up for the twin souls (or purpose)

Your twin soul is who you are with as an energy being – you were bi-unal when you separated into the flesh – some lifetimes you came together as father and daughter, some as mother and son – today its time to come together as brother and sister – ex: matrix – trinity and neo; matrix 2 – neo goes internal and then massages trinity's heart – now we are equal – now we can come together as one – she's in the background giving him wisdom and he moves out as the sun guided by her

Earth – daughter earth, value, healing, main is security (power is internal not outside)

Water – mama of ancestry and mama magic (internal)

All energy vibrations come from the universe

Kundalini rises internally through the chakras – connects you to the universal whole; it's the melanin – puts us at the top of the spiritual hierarchy – our melanin draws its energy from the universe – black shirt in the sun draws it; water (mama) imparts the melanin; it also acts as the oil to harmonize the energy; you do not blend it, you harmonize it; balance

We are universal beings having a physical experience; it's about turning what's base into gold; mortals into immortals

Mama universe domain is planetary

Powers that have been are at the maximum of their abusive power; this is how we activate the opposite response; where they have abused their power and restricted our rights and liberties, now the universe is going to counteract and bring out liberation, not just this lifetime but all our past lifetimes up unto this December 21st. Now that we've crossed over into 2022 now we are going to get a return in equal measure, not only our personal but those of our ancestors – this is what qualifies us to step up as the new rules of the new age

Dealing with many levels

At planetary level, Saturn is the Lord of Karma – those who have abused their power will be taken down; reconciling all opposites; those who have been suffering are those now at the top

Cosmic Christ return – Saturn (The Celestialship of the North – book recommended by Bobby Hemmit)

Saturn is the planetary return of the Father (represents the original son of the Mother; Saturn, Seth, Kronis); first son of the great Mama; he is the planetary Father of the daughter Earth – earth was originally a star

Everything started Matriarchal; the original Black Mama Universe; our ancestors had the powers; they could fly, breathe under water, talk telepathically; we still have those powers, but we've been in the physical

We are made in the image of the Universe; manifested form

Energy unfolds from Mama to Son (physical) to Father to Daughter (spiritual) – highest vibrations, 4 components of the royal family through the 4 elements: Air,

Individual melanated man is the Son, but the collective energy the Sun

Sun is about exposure, resurrects into righteous father spirit then redeems the value of daughter earth

We are the vessels, as we step into our royal rulership, we are the vessels who can now channel that energy (ground 0) and manifest that energy at the physical level

We are the individual aspects of this larger aspect

Prince (cardinal fire - Aries); King (cardinal air - Libra); Queen (cardinal water - Cancer); Earth (cardinal earth Capricorn) – has been denied her value through materialism through tricks and illusion)

We can channel the energy

Father Spirit (your ancestors as your personal entourage to help you manifest that energy on the ground level) and Mother Soul (ancestors)

Whichever my ancestors have mastered in this creative technique, channel that vibration to me and let me manifest it; key is balance (from spirit and soul level)

We are the individual aspects of a larger collective spiritual operation; each of us chose a purpose and a mission. Now this is the last piece to fulfill – each has their own creative energy; all in one and one in all

Ex: the hand – all of these components come together to make a hand and each makes a contribution

Only the spirit can give you personal guidance and how to put your contribution

Each energy of zodiac comes into contribution in turn to the whole

We are transmitters as well as receivers

Spiritual Power vs. Material Power – mam bird pushing the daughter out of the nest so they can fly

\$myramoss813 – cash app

Contact: text for an appt – 336-965-018

13th Sign – highest

4 number of completion – higher uptake is 13 – completed all 4 levels to tap into the Mama magic

Mama energy means take care of your needs beyond your capability (faith and trust)

Father energy – logic reasoning and knowing

Father compromise and negotiates; Mother comforts but she don't play – protecting her family

Not about time; it's about levels you're taking into; individual, couple, family, all the way up to universe and planetary level

Daughter Earth comes into her role as Princess this is when we come into our star system; now she can go into balance with the Nubis, the ancient star system; she was the rejected stone that has become the corner stone

Willie Lynch they separated us from each other in energy; physical level Mother water (smothered) the fire of the power of the Son (kill off the father who would protect the family); she kept the son who could not grow; the Father abandoned the value of the daughter; this will self-perpetuate until something phenomenal came along that turned the energy around where the Mother no longer smothers the son power and he develops into the Father to take care of the Daughter.

9 is the number of stagnation – because when you add a number to nine, it comes back to that number; one of the phenomenals that happened in 2003 that helped bump us up to the tenth level

We are now at the 13th level

Retrograde – going backwards

Mercury retrograde – someone in their chart with 3 of them means there is a special mission and purpose

Capricorn represents the system and when it gets too corrupted, Aquarius (Uranus) will disrupt that corruption and wake up and throw it into chaos; disrupt the status quo to liberate us

Father Spirit and Mama Universe is getting ready to counterattack

Mercury is the magicians and messengers from spirit realm to the physical realm; it also deals with challenge; wherever your Gemini is that's where you channel; Mercury represents the conscious mind where Pisces represents the unconscious mind
